

Radiology—claims statistics and analysis

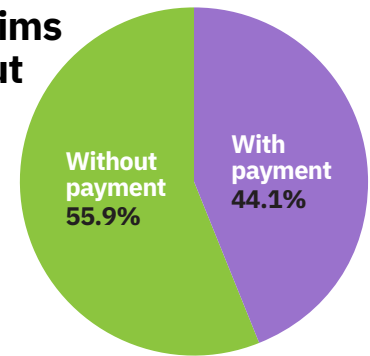

Factors that influence the frequency of radiology claims¹

1. How many different hospitals are associated with the provider?
2. What fraction of the provider’s diagnoses are Cerebrovascular?
3. What percentage of the provider’s patients are between 19 and 34 years old?
4. What percentage of the provider’s billed lines are performed in a hospital facility?
5. How many prescriptions were dispensed for anticoagulants?
6. How many patients have received services from this provider?

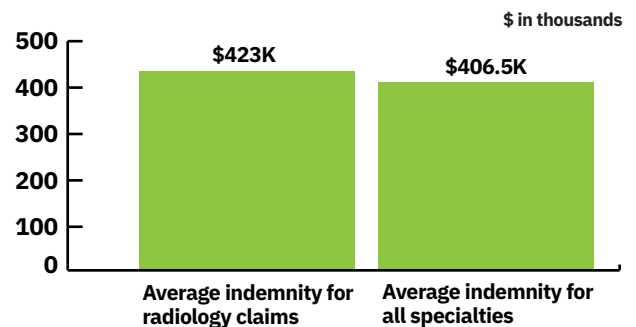

Top contributing factors²

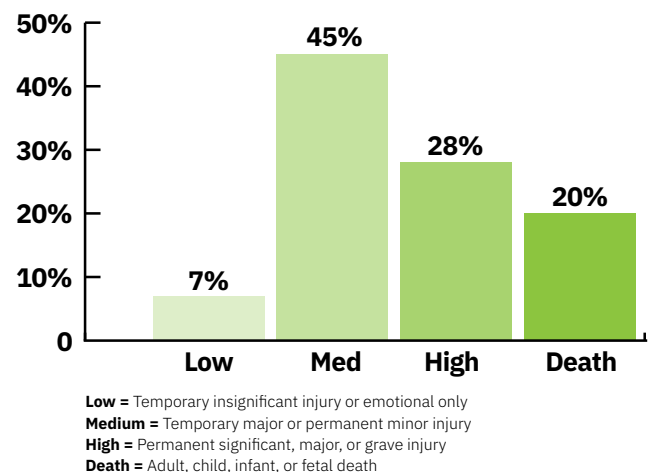

Radiology claims closed without indemnity payment²

Indemnity for radiology vs. all specialties²

Clinical severity²
